

AQUA SALES CENTER

The sales center for Aqua was created as a precursor to the residential condominium project bearing the same name. The design creates an atmosphere for potential buyers that would be reminiscent of the beachfront lifestyle accompanying their new residence. Clean lines and modern elements combined with natural features and the elegant use of color to create an overall effect that clearly defines Aqua's corporate identity. Transparent water walls propagate the sound of water through the sales center and add a unique interior feature that emphasizes the property's waterfront location.
