

### **KRAFT CONSTRUCTION WORLD HEADQUARTERS**

The 100,000 square foot Kraft Headquarters building is home to Florida's largest privately owned construction company. A modern, clean-lined design was chosen that highlights and contrasts raw and finished construction materials. The project consists of two main buildings connected by a second floor bridge, containing the majority of executive suites, administrative offices, and estimating offices, and an additional auxiliary structure at the rear. The buildings flare out to create the illusion of perspective and scale as one arrives via the main entry boulevard.
